

FOCUS ON: Improving the nomenclature for cytogenomics: what's new in ISCN 2024

Monday 2nd December 2024 13:00-14:00 GMT

Presented by Dr Ros Hastings
Chair of the ISCN Standing Committee and GenQA Consultant

The webinar will focus on the changes to the International Standard for Cytogenomic Nomenclature introduced in the 2024 edition:

- **Overview of changes introduced in ISCN 2024**
- **Genome mapping nomenclature**
- **Targeted chromosome analysis**
- **Targeted microarray analysis**
- **ISCN Educational tools available through GenQA**
- **ISCN forum**

Ros is the Chair of the Standing Committee for the ISCN and a consultant for GenQA. She is the author of a range of books and publications on genetics, NIPT, PGD, ISCN, EQA and best practice guidelines. Ros has worked in cytogenomics for over 40 years, with a particular interest in the application of ISCN across a breadth of clinical indications. She has been involved in the development of new nomenclature for genome mapping, targeted chromosome and targeted microarray analysis.
