

FOCUS ON Cytogenomics: Acquired ISCN for beginners

Genetic testing has developed significantly over the past few years and the **International System for Human Cytogenomic Nomenclature (ISCN)** is continuously reviewed to reflect these changes.

Clinical reports and multiple EQAs provided by GenQA require the correct use of ISCN and errors are frequently encountered.

As participant meetings have been postponed during 2021, GenQA is holding monthly webinars to promote our educational commitment.

Acquired ISCN for beginners webinar Thursday 14th October 2021, 11am GMT (12:00 BST)

- Review of Acquired ISCN: review of acquired nomenclature in ISCN 2020, including:
 - ◇ Basics—what is a clone?
 - ◇ Karyotyping
 - ◇ FISH for break apart, dual and triple fusion probes
 - ◇ Region specific assays
 - ◇ Arrays
 - ◇ Optical Genome Mapping (OGM)
- ISCN 2020 online and forum platforms
- Test your current knowledge in an interactive quiz
- New pilot ISCN EQA opens 18th October 2021

Register by **14th October 2021** or the free webinar and live Q&A session, at:
<https://attendee.gotowebinar.com/register/7527292206154621968>

If you wish to submit a question for the Q&A session, then please email info@genqa.org by 13th October 2021.

Registered participants will have priority access to the webinar for one month (if you are unable to join us on the day).
