

FOCUS ON 2024

GenQA are continuing to host our popular **FOCUS ON** sessions to provide educational support to our participants.

The webinars will be advertised for registration approximately one month beforehand. The scheduled topics for autumn/winter 2024 are:

1st October 2024 14:00-15:00 BST

Principles for efficient and proportionate analysis of genomic variants

Guest speaker: Ian Berry, Consultant Clinical Scientist, Bristol, UK

15th October 2024 12:00-13:00 BST

Selecting tools for assessing and classifying genomic variants

Guest speakers: Dr Julia Baptiste, Clinical Scientist, UK
Dr Swati Tomar, Sophia Genetics

12th November 2024 12:00-13:00 GMT

Implementing a national fetal sequencing service: benefits, challenges and solutions

Guest speaker: Prof Lynn Chitty, Professor of Genetics and Fetal Medicine, GOSH, UK

2nd December 2024 13:00-14:00 GMT

Improving the nomenclature for cytogenomics: what's new in ISCN 2024?

Dr Ros Hastings, Chair of ISCN Standing committee and GenQA Consultant

For access to the webinar and **LIVE Q&A session** ensure you register early. Registered participants will have priority access to the webinar for one month. The webinars will be available afterwards on the GenQA [YouTube](#) channel.

Details on each FOCUS ON topic and how to register will be advertised on our [events](#) page and on our [LinkedIn](#) account.

We look forward to receiving your questions!
GenQA team
