

## FOCUS ON EQA SPECIALITIES 2022 (January - June)

GenQA will continue to host our popular monthly **FOCUS ON** sessions to provide educational support to our participants.

The webinars will be advertised with a poster at the beginning of each month. The scheduled disciplines and topics for 2022 are:

<b>GenQA update: GenQA - evolving for you during 2022</b>	<b>January</b>
<b>Cytogenomics: Meiotic Chromosomal segregation</b>	<b>February</b>
<b>Quality: Quality Management and its Impact on real life</b>	<b>March</b>
<b>Variant classification: SNV classification - It's all about the evidence</b>	<b>April</b>
<b>Molecular Pathology: Fusion testing in solid tumours</b>	<b>May</b>
<b>Reproductive Genetics: NIPT Participants Workshop</b>	<b>June</b>

For access to the webinar and **LIVE Q&A session** ensure you register early. Registered participants will have priority access to the webinar for one month. The webinars will be available afterwards on the GenQA **YouTube channel** (<https://www.youtube.com/genqa>)

Details on each month's FOCUS ON topic and how to register will be advertised at [www.genqa.org/news](http://www.genqa.org/news), and on our social media accounts (**Twitter** and **LinkedIn**).

We look forward to receiving your questions!  
GenQA team

### Providing EQAs for End to End Testing
